

SYSTEM AND METHOD FOR PROVIDING FUTURES
CONTRACTS IN A FINANCIAL MARKET ENVIRONMENT

ABSTRACT OF THE DISCLOSURE

A method for offering an asset in a financial environment is provided that includes receiving a request to perform a selected one of a purchasing and a selling
5 operation for a futures contract. The futures contract includes a first asset class having a first value associated therewith and a second asset class having a second value associated therewith. A price for the futures contract is determined at least partially by the
10 first and second values.
